All prices and fees are excluding value-added tax (VAT) and any other taxes or government levies unless explicitly otherwise stated.

4.2. NameBlock reserves the right to revise the Fees from time to time, provided that NameBlock shall provide at least 60 days notice to the Reseller prior to any increases in fees.

4.3. In advance of incurring any Fees, the Reseller shall establish a Deposit Account, Credit Facility, or Payment Security acceptable to NameBlock as per Appendix 3, which acceptance will not be unreasonably withheld so long as payment is assured. In the case of a Deposit Account, all Service Fees are due immediately upon receipt and, in the case of a Credit Facility or Payment Security, Service Fees will be billed in arrears, for initial and renewal fees for the Services, or upon provision of other services provided by NameBlock to the Reseller. Payment shall be made via debit or drawdown of the Deposit Account, Credit Facility, or Payment Security approved by NameBlock. NameBlock shall provide monthly invoices to the Reseller. 4.4. Credit Facility or Payment Security. The terms of the Credit Facility or Payment Security shall be determined by NameBlock, in its sole discretion, in a separate policy provided to Reseller and may be amended from time to time with no less than thirty (30) days' written notice to Reseller.

4.5 In the case of a Deposit Account, all Service Fees are due immediately upon receipt of NameBlock's monthly invoices and, in the case of a Credit Facility or Payment Security, all Service Fees will be due and payable in arrears, as invoiced. In order to satisfy any outstanding account balances, NameBlock may draw upon the Reseller's Credit Facility or Payment Security. If this occurs, the reseller shall replenish the Credit Facility or Payment Security to (at least) the pre-draw level immediately upon completion of draw. If the Reseller's Credit Facility or Payment Security is depleted, services for the Reseller will be suspended and new services shall not be provisioned until the Credit Facility or Payment Security, as applicable, is replenished in accordance with the foregoing. NameBlock's performance under this Agreement is subject to, and conditioned in all respects upon, the timely payment by the Reseller of all fees owing to NameBlock under this Section 4.

4.6. Overdue Payments. If the Reseller fails to pay an invoice within the term of payment, the Reseller is in default without a warning or notice of default being required. 4.6.1 If payment is delayed, an interest charge will be incurred on overdue payments for each month started or at that time extra fee according to currently applicable law or debt collection regulation.

4.6.2 If the Reseller continues to be in default in his obligation to pay the outstanding invoice with accrued interest, NameBlock can place the matter in the hands of a lawyer or a debt-collector agency. All collection costs incurred by NameBlock in respect of such collection, both in law (judicial costs) as well as out of law (extrajudicial costs) shall be for the Reseller's sole account.

4.6.3 All payments due under this Agreement shall become due immediately upon termination of this Agreement despite any other provision herein. All payments due under this Agreement shall be made without any deduction by way of set off, counterclaim, discount or abatement or otherwise except where the Reseller is expressly permitted to do so by law or Order of Court.

4.6.4 The parties agree that any fees paid or payable are non-refundable. Accordingly if the Agreement is terminated or the Services are canceled, NameBlock will be entitled to retain such fees.

Receiving Party agrees to reasonably cooperate with the Disclosing Party in seeking such order or other remedy. Receiving Party further agrees that if the Disclosing Party is not successful in precluding the requesting legal body from requiring the disclosure of the Confidential Information, it will furnish only that portion of the Confidential Information which is legally required.

5.1.7. The Receiving Party's duties under this Subsection 5.1 shall expire two (2) years after the expiration or termination of this Agreement or earlier, upon written agreement of the parties.

5.2.6. Neither Party shall use the trade names, trademarks, service marks, or the proprietary marks of the other Party in any advertising, sales presentation, news releases, advertising, or other promotion or marketing materials without such other Party's prior written consent, which shall not be unreasonably withheld; provided, however, that NameBlock shall have the right without prior approval to identify Reseller as a reseller of NameBlock's services. In addition, the Parties agree that it would be mutually beneficial to issue a joint press release regarding their relationship and shall work together to issue a mutually agreed upon press release within a reasonable time after the Effective Date.

APPENDIX 1 - NameBlock Services

The NameBlock Services consists of various cloud-based services to prevent abuse online as well as the possibility to block domain names from registration through NameBlock's own blocking services, including but not limited to, AbuseShield and BrandLock and its associated product variations and packages across TLDs in both the DNS and Web3.

NameBlock also offers a marketplace for domain name blocking services. For any of the offered Third Party Blocking Services, you are required to comply with the terms and conditions as well as the respective dispute resolution policy of the respective Third Party Blocking Service.

NameBlock Services are made available through the NameBlock System and includes, but is not limited to, the Services listed below, and as may be amended from time to time in accordance with notice requirements of the Agreement.

AbuseShield

Blocks *variants* of a Block Label that are commonly used for abusive purposes.

AbuseShield Blocks are based on a domain name registration or blocked domain name where the SLD is the Block Label. AbuseShield uses NameBlock's abuse variants algorithm to generate an Abuse Variant List consisting of variants of the Block Label, based on e.g. abuse suffixes, homoglyphs, common misspellings etc, and subsequently blocks such variant Domain Names within the same TLD as the Block Label domain name. The Block Label *alone*, i.e. without any affixes, suffixes or in other ways altered, will not be Blocked. The number of variants generated and Blocked will depend on several factors, including but not limited to, the number of characters in the Block Label, availability in a particular TLD, and other product or policy restrictions impacting the variant output. Finally, AbuseShield's carefully curated exclusion lists and filters will automatically remove certain variants that will not be included in the Block.

Example: Block Label "microsoft" would generate hundreds of Variants, e.g. "wwwmicrosoft.TLD" and "m1cr0s0ft.TLD". The Block Label itself, i.e. the "microsoft.TLD" domain name registration, won't be blocked.

AbuseShield Package

Ordering the AbuseShield product for multiple TLDs at the same time is offered via separate order form and subject to special eligibility requirements as outlined below.

Requirements:

The Block Label must not be an IDN or start with xn--

The AbuseShield Block Applicant must either:

- own the Block Label Domain Name registration, a valid BrandLock block, or a valid block in other NameBlock approved third party blocking service in the TLD for which the AbuseShield Block is ordered; OR
- as it relates to orders for an AbuseShield Package, own a valid SMD file covering the term for which the AbuseShield Package order is placed.

For more details and up-to-date information see <https://nameblock.com/reseller-resources> and <https://nameblock.com/legal>

BrandLock (Exact Match) Blocking

Blocks Domain Names where the SLD is exactly matching the Block Label. Only one Block allowed per Domain Name.

NameBlock will not accept a Block Application unless the applied-for Block Label meets the certain technical and syntax requirements, as listed at <https://nameblock.com/reseller-resources>

Application Requirements and Process:

NameBlock will automatically check if the Block Label matches an existing SMD file or registered trademark, and require an SMD file or proof of trademark registration to be submitted if a match is found. If no match is found, NameBlock will check the Block Label against the NameBlock exclusion list before accepting the Block Application.

Unblocking:

A Blocked Domain Name can at any time be unblocked by the Block Owner (NameBlock Fees apply), provided that the person or entity requesting the unblock meets the TLD registration requirements (if there are any) and pays the TLD registration fee. A Block or individual Blocked Domain Name may also get unblocked in accordance with NameBlock terms and conditions, dispute policy and/or ICANN requirements.
